

Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.

SUPPLEMENT TO
The Gazette of India.

No. 21.]

SIMLA, SATURDAY, MAY 21, 1904.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 19th May 1904, based on the India Daily Weather Reports of the period.

The weather has been very disturbed during the week under review and rain in greater or less quantity has been received in all districts.

On the 13th a depression was passing eastward through the Punjab and the weather was rainy and unsettled in the north-west, while the usual showers were falling over Burma, north-east India and the south of the Peninsula. The principal amounts reported on this day were 4.58" at Berhampore and 2.95" at Silchar. The reports of the 14th showed that conditions were practically unchanged. A depression was still lying over the Punjab and duststorms on the plains and thunderstorms with rain on and near the hills were reported from the north-west. At the same time general showers had been received over Burma, north-east India and the south of the Peninsula. The only considerable falls on this day were 3.31" at Akyab and 2.11" at Cochin. On the 15th there was still no change to record beyond some extension of the rainfall area over north-west India. The rainfall was somewhat lighter than on the two preceding days and the heaviest amounts were 1.72" at Moulmein, 1.15" at Shillong and 1.60" at Madura. The reports of the 16th showed that showers had been very general, only Bombay and the south division of the East Coast having been absolutely rainless. The rainfall was, however, comparatively light, Cherra Poonjee reporting 1.59" and Bogra 1.28" which were the heaviest falls. On the 17th the rainfall area diminished, but fairly general rain was reported from Assam and scattered showers from Burma, the North-West Himalayas, some central divisions and the south of the Peninsula. The amounts were small, with the exception of 2.20" at Bellary and 1.61" at Dhubri. During the 18th and 19th there occurred a further contraction of the rainfall area, and only scattered showers were received, except over Burma, where general rain and cloudy overcast weather were reported on both days.

The rainfall table shows that during the week under review actually or practically no rain was received over the Darbhanga subdivision, the Baluchistan division, the Jubbulpore subdivision, the Jhansi and Indore subdivisions and the Gujarat division, while in all other places rain fell and in the case of the Burma (West), Calcutta, Dinajpur, Babraich, West Himalayas, West Gangetic Plain, Cuttack, Ranchi, Raipur, Jaipur, West Coast, West Satpuras, Deccan, south India and East Coast (South) divisions and subdivisions the week's rainfall was more or less in excess of the normal.

Except over Bombay, the extreme north-west of India and Baluchistan on the west, and over Burma in the east, the seasonal rainfall has been heavier than usual.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
14th May 1904.

Madras.—There was light rainfall during the week in parts of the Circars, Cuddapah, the Carnatic and Tinnevely, and fair to good elsewhere. Irrigation supplies are insufficient in parts of the Circars, the Deccan, Salem and Southern districts. Ploughing, sowing and transplanting are in progress in parts. The standing crops are generally fair. Harvests continue with fair to normal outturn. Pasture is scanty in parts of the Circars, the Deccan and Madura. The condition of cattle is generally good. Prices are almost stationary.

Bombay.—There was moderate rain during the week in parts of Dharwar and Kanara; slight in parts of Satara and Belgaum; and very slight in parts of Karachi, Ahmednagar, Poona, Sholapur and Bijapur. The standing crops have been slightly damaged by locusts in parts of Ratnagiri, the Deccan and Kanara; by blight in parts of Thar and Parkar; and are generally in good condition elsewhere. Harvesting of spring crops has been completed in Karachi and Sukkur; is nearly over in Ahmedabad and Ratnagiri; and is in progress in parts of Belgaum. Threshing continues in parts of Sindh and Nasik. Cotton has been slightly damaged by rats in parts of the Panch Mahals and by locusts in parts of Dharwar. Picking has been completed in Surat; is nearly over in Dharwar; and continues in parts of Ahmedabad, Kaira and Baroda. Preparation of lands for next season is generally in progress. The fodder-supply is sufficient. Agricultural stock and water-supply are generally sufficient. Prices have fallen in three districts; risen in four districts; and are stationary elsewhere.

Bengal.—The rainfall during the week was general and in some places heavy. Ploughing of land and sowing of paddy and jute are in progress. Prospects are generally good, but some damage to jute has been caused by rain in Mymensingh and also in the Brahmanbaria sub-division of the Tippera district. The outturn of wheat and of oilseed crops is estimated at 90 per cent. of a normal crop. Fodder and water are generally sufficient. The price of common rice has risen in nine districts; has fallen in ten, and is stationary in the remainder.

United Provinces.—Rain fell during the week in thirty-seven districts accompanied by a slight fall of hail in Almora, Bahraich, Gorakhpur and Hamirpur. Threshing and winnowing of spring crops are almost finished. Sugarcane and extra crops continue to be irrigated. The standing crops are doing well, but slight damage by rain and easterly winds is reported from a few districts. Fields are being prepared in places for the autumn crops. Sowing of indigo and opium weighments continue. Supplies are sufficient and prices are stationary.

Punjab.—Rain has fallen in Hissar, Delhi, Umballa, Amritsar, Sialkot and Rawalpindi. Slight falls have also been reported from Jullundur, Ferozepore, Lahore and Mianwali districts. The price of wheat is falling in Jullundur, Amritsar and Shahpur. The prices of other food-grains are fluctuating. Cutting of spring crops is finished in several districts. Threshing of wheat is in progress in most districts. Sowing of extra spring and autumn crops continue in certain districts. Plague is seriously interfering with agricultural operations in Shahpur. The condition of extra spring and autumn crops is generally good. The outturn of spring crops is reported good in most districts. Wheat has been slightly damaged on the threshing floor in parts of Amritsar and Sialkot by untimely rainfall. Hailstones fell in parts of Lahore and Amritsar and caused slight damage to extra spring crops in parts of Amritsar. Cattle are generally in good condition throughout the Province. Fodder is sufficient in all districts except in parts of Delhi.

North-West Frontier Province.—Showers fell in all districts except Bannu and Dera Ismail Khan. Prospects of the standing crops are good. Harvesting of spring crops is in progress. The outturn of barley has been reduced by hot winds. Sowings of autumn crops are in progress. Stocks of food-grain and fodder are ample. Prices are falling.

Burma.—The rainfall of the week was general and seasonable. Ploughing for wet weather paddy has commenced in Thaton and sowing on hill sides in Tavoy. Sowing of early wet weather paddy has also begun in Kyaukse. Reaping of dry weather paddy has begun in the Ruby Mines district and has been completed in Myitkyina and in parts of Katha, Sagaing and the Lower Chindwin. Harvesting of miscellaneous crops has been finished in Magwe, Mandalay and Shwabo and plucking of chillies in the Myinmu sub-division of the Sagaing district. Sowing of sesamum has been started in Magwe and Kyaukse. The standing crops are mostly doing well but during the week dry weather paddy crops have been somewhat damaged by rain in the Tigyaing township of Katha. The price of paddy has risen considerably in Amherst and slightly at three centres and has fallen considerably in Minbu. Elsewhere it is stationary. Prices are more or less normal everywhere.

Central Provinces.—The weather has been hot and cloudy with high winds. Slight rain has fallen in seventeen districts. Threshing and winnowing operations have almost been completed. Wheat and linseed have yielded an outturn slightly below normal. The preparation of land for autumn sowing continues. Fodder is getting dearer in the Nagpur district. Prices have fallen in the Bhandara district, elsewhere they have fluctuated slightly.

Assam.—There was rain throughout the Province during the week. Ploughing for and sowing of early and late rice, plucking of tea and planting of sugarcane are in progress. Tea is still retarded by low temperature. Reaping of early transplanted rice in Sylhet has been finished but the outturn is poor owing to damage by floods. Sowing of cotton has commenced. Prices—common rice—Silchar, 18; Sylhet, Dhubri and Tezpur, 16; Gauhati and Sibsagar, 14; Nowgong and Dibrugarh 13 seers per rupee.

Mysore.—The rainfall of the week was good in the Civil and Military station and in Hassan, and fair in other parts. Prices are steady. Standing crops are in good condition. Prospects of the season are good. Cattle are healthy. Water and fodder are available.

Coorg.—Rainfall 3 inches 16 cents. Ploughing for rice continues. Prices of food-grains are normal. Water and fodder are sufficient.

Hyderabad.—Rainfall 27 cents. Late rice is in good condition and the harvest continues. Lands are under preparation for autumn sowings. Prices—wheat 14, rice 11½ and *juar* 29½ seers per *halli* rupee.

Rajputana.—There was rain in parts during the week. Agricultural operations are satisfactory. Prospects of crops and condition of cattle are generally good. Fodder is sufficient. Prices are favourable.

Central India.—Slight showers fell during the week in Gwalior, Baghelkhand and Bhopawar. Agricultural operations are in progress in Baghelkhand, Malwa and Bhopawar, and have been completed elsewhere. The standing crops are good in Baghelkhand. Agricultural stock and pasturage are generally good. Pasturage is indifferent in parts of Gwalior and in Bhopal. Prices are low in places; normal in Gwalior, Indore, Bhopal and Baghelkhand; falling in Bundelkhand; and are stationary in Malwa and Bhopawar.

Kashmir.—The weather is rainy. Rivers are in flood. Prices are stationary.

Jammu.—There was slight rain during the week. Prices are fluctuating. Wheat sells from 14 to 28 and maize 24 to 38 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient. Harvesting and threshing of spring crops are going on. Sowings of autumn crops are in progress. The recent rains have been injurious to the standing spring crops.

Nepal.—Rainfall 1.01 inches. The outturn of barley was good. The sowing of Indian-corn and upland rice is finished. The weather has been cool. The price of rice is 6 seers for the rupee.

J. WILSON,
Secretary to the Government of India.

H. H. RISLEY,
Secretary to the Government of India.

Printed and published for the GOVERNMENT OF INDIA at the GOVERNMENT CENTRAL PRINTING OFFICE, Simla.

SUPPLEMENT TO
The Gazette of India.

No. 22.]

CALCUTTA, SATURDAY, MAY 28, 1904.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

QUANTITY (in hundredweight) of WHEAT imported by rail and river and by sea into CALCUTTA, the City of BOMBAY, and KARACHI, in March 1904, and from 1st January to 31st March 1904, and in the corresponding periods of 1902 and 1903

H. H. RISLEY,
 Secretary to the Government of India.

B

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 a.m. on Thursday, the 26th May 1904, based on the India Daily Weather Reports of the period.

A considerable change has occurred in the weather over the southern part of the Indian region. On the 20th there occurred an advance of moist south-west winds over Ceylon, the extreme south of the Peninsula, the south of the Bay and Burma. These winds continued over the south of the Peninsula and Ceylon throughout the week, the sky daily growing more cloudy until the 26th when overcast skies were reported from most places in this area. The principal falls of rain over southern India and Ceylon during the week were:—1'37" at Tinnevely, 1'16" at Coimbatore on the 20th; 0'78" at Trivandrum on the 21st; 1'10" at Cochin on the 22nd; 4'42" at Colombo on the 23rd; 1'40" at Mysore and 1'39" at Cochin on the 24th; 2'88" at Trivandrum on the 25th; and 2'95" at Cochin and 2'91" at Mysore on the 26th. In Burma the advance of moist winds was maintained during the 20th and 21st, Moulmein reporting 5'60" and Mergui, Rangoon, Diamond Island and Toungoo over 1'00" of rain on the 20th and Mergui and Moulmein over 1'00" of rain on the 21st. On the 22nd the wind shifted to east-north-east at Diamond Island showing that the moist winds had withdrawn and simultaneously rain fell off and was light over Burma until the 25th and 26th, when the southerly winds at Diamond Island gave evidence of a fresh advance. This second advance apparently brought about the formation of a moderate cyclonic storm over the centre of the Bay. This storm advanced to the Madras Coast, which it struck near Cocanada on the early morning of the 26th, occasioning rain varying between 1'00" and 3'00" at the stations along the coast.

In north-east India conditions have been fairly normal. Rain gradually increased, both in amount and extent, until the 26th, when, owing to the complication arising from the presence of the storm in the Bay some decrease in the rainfall occurred. The principal falls in this region were 1'21" at Jessore on the 20th; 2'28" at Chittagong and Barisal on the 21st; 2'13" at Mymensingh on the 22nd; 1'45" at Dhubri on the 23rd; 5'08" at Dhubri on the 24th; 5'25" at Mymensingh on the 25th; and 2'10" at Cherra Poonjee on the 26th.

In north-west India the weather has been much finer during the week under review, than it was last week, but on the Kashmir hills daily and over the submontane districts occasionally the weather has been unsettled with thunderstorms occasioning hail and rain.

The rainfall table shows that actually or practically no rain fell during the week over the Bahraich, Patna, Raipur, Jubbulpore and Hyderabad subdivisions and the West Gangetic Plain, North-West, Dry, Central India, Gujarat and West Satpuras divisions. The week's rainfall was generally lighter than usual, except over the south and east of the Peninsula and Bengal.

The seasonal rainfall to date has been lighter than usual over Burma and parts of north-western and western India.

and Director General of Indian Observatories.

J. WILSON,

Secretary to the Government of India.

SIMLA:
The 26th May, 1904.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
21st May 1904.

Madras.—There was no rain in Chingleput; in parts of the Circars and South Arcot the fall was light; and fair to good elsewhere. Irrigation supplies are insufficient in parts of the Circars, the Deccan, South Arcot, Salem and parts of South Canara. Ploughing, sowing and transplanting are in progress in parts. The standing crops are generally fair. Harvests continue in parts with fair to normal outturn. Pasture is scanty in parts of the Circars, the Deccan, Madura and South Canara. Fodder is procurable and condition of cattle is generally good. Prices are almost stationary.

Bombay.—There was moderate rain during the week in parts of Belgaum and Dharwar; slight in parts of Karachi, Satara, Bijapur and Kanara; and very slight in parts of Hyderabad, Thar and Parkar, Khandesh, Nasik, Ahmednagar, Poona and Sholapur. The standing crops have been slightly damaged by locusts in parts of the Deccan and Belgaum. Threshing of spring crops continues in parts of Sindh and Nasik. Sowing of rice has commenced in parts of Ratnagiri, Belgaum, Dharwar and Kanara. Picking of cotton is nearly completed in Dharwar and continues in parts of Ahmedabad and Kaira. Preparation of lands for next season is generally in progress. Fodder-supply is sufficient. Agricultural stock and water-supply are generally sufficient. Prices have fallen in three districts; risen in six districts; and are stationary elsewhere.

Bengal.—The rainfall during the week was general, but not evenly distributed. More rain is needed in Darbhanga and in parts of Burdwan, the 24-Parganas and Purnea. Heavy rainfall has retarded the weeding of jute in parts of Mymensingh and rendered the prospects of crops unfavourable in Jalpaiguri; prospects are otherwise good. Planting of sugarcane, sowing of autumn crops and preparation of lands for winter rice continue. Fodder and water are generally sufficient. The price of common rice has risen in nine districts; has fallen in three; and is stationary in the remainder.

United Provinces.—Rain has fallen in forty districts. Irrigation of sugarcane and of extra crops continues. Slight damage to extra crops by rain is reported from Bijnor. Preparation of fields for autumn crops has commenced. Indigo continues to be sown and irrigated and opium weighments are almost finished. Slight scarcity of grass exists in Cawnpore. Supplies are sufficient and prices are stationary.

Punjab.—Rain has fallen in parts of Hissar, Delhi, Sialkot and Rawalpindi. Slight showers have also been reported from Umballa, Jullundur, Ferozepore, Lahore, Shahpur and Mooltan. The prices of all food-grains show a general downward tendency. Harvesting of spring crops is in progress in some districts. Threshing of wheat continues in several districts. Sowing of extra spring and autumn crops is going on in a few districts. Progress with the harvesting of spring crops is rather slow for want of labour in Shahpur. The condition and prospects of extra spring and autumn crops are generally good. The outturn of spring crops is reported good in most districts. Wheat has been slightly damaged on threshing floors in parts of Sialkot by untimely rain. Extra spring crops have been slightly damaged by hailstones in parts of Sialkot and Mooltan; by storms in Amritsar; and by insects in Shahpur. Cattle are generally in good condition throughout the Province. Fodder is sufficient in all districts except in parts of Delhi.

North-West Frontier Province.—Showers fell in Hazara only during the week. The prospects of the standing crops are good. Harvesting of spring crops is nearly finished and the outturn is good. Grain is being housed in Dera Ismail Khan. Sowings of autumn crops are in progress. Stocks of food-grains and fodder are ample. Prices are falling.

Burma.—The rainfall of the week was almost general and was heavy in Tenasserim. Sowing in nurseries has begun in the Bogale township of Pyapon. Reaping of dry weather paddy has been completed in parts of Pakokku, Sagaing and Myingyan and continues in several districts. Ploughing for sesamum has commenced in Sagaing and Yamethin. Planting of sugarcane has been finished in the Pyinmana sub-division of Yamethin. Harvesting of miscellaneous crops is approaching completion. The standing crops are on the whole doing well, but slight damage to dry weather paddy is reported in one township each of Katha and Myingyan due to flood and erosion of bank, respectively. The price of paddy has risen considerably in Pegu and slightly in seven districts; elsewhere it is unchanged.

Central Provinces.—The weather has been cloudy and hot with occasional high winds. Light rain has fallen in four districts. Threshing and winnowing operations have been completed in all districts save Jubbulpore, Seoni and Chhindwara. Preparation of land for autumn sowings continues. The second rice crop in the Sironcha tahsil of the Chanda district promises a good outturn. Fodder is getting dearer in the Nagpur district. Scarcity of water is being felt in parts of the Mandla district. Prices have fallen slightly in Saugor, Damoh and Jubbulpore, but are generally steady elsewhere.

Assam.—Continued rain, especially heavy in Darrang, Goalpara and Sylhet, is delaying cultivation and growth of rice, sugarcane and jute. Ploughing for and sowing of early and late rice, plucking of tea and sowing of cotton are in progress. Planting of sugarcane is nearly finished. Tea prospects have improved, the weather being less unfavourable. Prices—common rice—Silchar, 18; Sylhet and Dhubri, 16; Tezpur, Nowgong and Sibsagar, 14; and Gauhati and Dibrugarh 13 seers per rupee.

Mysore.—Rain—one inch 2 cents in the Civil and Military station; good in Tumkur and Mysore and fair in other parts of the Province. Prices are steady, except in parts of Tumkur, Shimoga and Chitaldroog districts. The standing crops are in good condition. Prospects of the season are good. Cattle are healthy, except in parts of Shimoga. Water and fodder are available.

Coorg.—Rainfall—one inch 19 cents. Ploughing for rice continues. Coffee is in berries. Prices of food-grains are normal. Water and fodder are sufficient.

Hyderabad.—Rainfall—21 cents. The late rice harvest is nearing completion. Lands are being prepared for autumn sowings. Fodder and water scarcity is reported from parts. Prices—wheat 14½, rice 11 and *juar* 29½ seers per *kalli* rupee.

Rajputana.—The rainfall was general throughout the Province, except in Sirohi and the hilly tracts of Mewar. Agricultural operations are satisfactory. Threshing and winnowing are in progress and land is being prepared for autumn cultivation. Prospects of the crops and condition of cattle are generally good. Fodder is sufficient. Prices are rising in ten States; falling in two; and are steady elsewhere.

Central India.—There were slight showers during the week in Gwalior and Bhopawar. Agricultural operations are in progress in Indore, Baghelkhand, Malwa and Bhopawar. The standing crops are good in Baghelkhand. Agricultural stock and pasturage are generally good. Pasturage is indifferent in Bhopal and in part of Gwalior. Prices are low in places. They are normal in Gwalior, Indore, Bhopal and Baghelkhand; falling in Bundelkhand; low in Malwa; and stationary in Bhopawar.

Kashmir.—The weather is bright. Prices are stationary.

Jammu.—Slight rain has fallen in parts of the Province. Wheat sells from 18 to 28 and maize from 24 to 38 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient. Sowings of autumn crops are in progress. Hail stones have damaged the young crops. Threshing and housing of spring crops are in progress.

Nepal.—Rainfall 1·01 inches. The weather continues cool. The wheat outturn is good. The standing crops are in good condition. Price of rice is 6 seers for the rupee.

SUPPLEMENT TO
The Gazette of India.

No. 23.)

CALCUTTA, SATURDAY, JUNE 4, 1904.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

- ESTABLISHMENTS.

Nos. 419—435.

Simla, the 24th May 1904.

RESOLUTION.

The Governor General in Council observes that allegations have frequently been made to the effect that Europeans and Eurasians enjoy a disproportionate share of State patronage in India and that the legitimate claims of the natives of the country to employment in the public service are comparatively neglected. The matter has been made the subject of complaint by non-official members of the Council of the Governor General for making laws and regulations: it has also been discussed from the opposite standpoint by writers of authority on Indian administration. Moreover, prominence has more recently been given to it in a certain section of the public press. His Excellency in Council has therefore deemed it advisable to institute a special inquiry, extending over every branch of the administration, with the object of ascertaining how far the allegations are well founded.

2. For this purpose the figures of the present day have been compared with those of former periods. It cannot indeed be claimed that the appended statistics attain to mathematical correctness, as will at once be apparent from the explanation that in respect of past years the records as a rule do not give complete information as to the race and religion of employes, which must be inferred from their names. This circumstance makes it impossible in many cases to distinguish between Europeans and Eurasians, while in others it has probably led to Native Christians being treated as of European origin. But the Government of India do not think that the margin of error which these difficulties involve detracts in any appreciable measure from the value of the general conclusions which the figures suggest. Establishment books giving a nominal roll of the personnel of all ranks of Government servants are maintained by the Accountants General. These records are preserved for 25 years. For purposes of comparison, therefore, the years 1867, 1877, 1887, 1897 and 1903

have been selected. Appointments on a pay of under *R75 per mensem* have been excluded from the scope of the inquiry, as it is evident that below that limit natives of India have practically a monopoly of the appointments in Government service. The statistics extend over a longer period than any hitherto published, and they enter into greater detail than those presented to Parliament in 1892, which referred only to the state of things prevailing on the 31st March 1890, or than those prepared for the Royal Commission on the administration of the expenditure of India which reported four years ago.

3. It remains to explain briefly the general scheme of the attached statements in which the results of the inquiry have been tabulated. Part A, page 1, is a general statement of all civil appointments in India, showing the number held by Europeans, Eurasians, Hindus, and Muhammadans respectively, at the five periods for which figures have been procured. Page 2 of the same statement shows the proportion that each grade of appointments bears to the total number, and the percentages of appointments in each grade held by the various classes of employés. Page 3 gives the same results as page 2 in the form of a simple diagram, devised with the idea of exhibiting the main results, so that they can be apprehended at a glance. Part B consists of provincial tables, giving the same set of facts for each of the civil provinces of British India. Appointments directly under the Government of India have treated for this purpose as though they pertained to a province of their own. Percentage tables and diagrams are attached to each of the provincial tables, as in Part A. Part C consists of a similar set of tables for the departments of Government. These are arranged according to the classification adopted in the civil estimates, and do not in all cases correspond exactly with the organization adopted for administrative purposes. The tables in Part C give actual figures only.

4. With the object of elucidating the main results of the investigation the statements marked Summaries I and II have been prepared. From the former it will be seen that while the development of the country and the organization of its administration have resulted during the past 36 years in an increase in the total number of civil appointments on a pay of over *R75* from 13,431 to 28,378, an increase of 110 per cent., the number of posts held by Europeans has increased only by 36 per cent., and the number held by Eurasians by 106 per cent. On the other hand, the number held by Hindus has risen by 179 per cent., and the number held by Muhammadans by 129 per cent. The joint increase in the case of Europeans and Eurasians is 61 per cent. only; and the increase in the case of natives of this country is 171 per cent. In the percentage of total posts under Government, natives have gained 13 and Europeans and Eurasians have lost 10 a corresponding extent.

5. The results of an examination by grades are perhaps even more striking. More than half of the appointments in India are and always have been posts on less than *R200* a month. The European element in these was always small, and is now less than 10 per cent. Of posts on *R200* to *R300*, the native proportion has risen from 51 per cent. to 60 per cent.; on *R300* to *R400* from 23 per cent. to 43 per cent.; on *R400* to *R500* from 21 per cent. to 40 per cent.; on *R500* to *R600* from 9 per cent. to 25 per cent.; on *R600* to *R700* from 15 per cent. to 27 per cent.; on *R700* to *R800* from 5 per cent. to 13 per cent. Thus in no single grade has the proportion of Europeans increased, while the native increase has been continuous and striking, and has been larger in the higher grades than in the lower. The *R800* line may be said to mark the limit of the Provincial Service. Between *R800* and *R1,000* there were, in 1867, 4 natives in Government employ; there are now 93. Posts on *R1,000* and over may be regarded as superior. In 1867, out of a total of 648 such appointments 12 or a percentage of 2 were filled by natives, all of whom were Hindus. In 1903, out of 1,370 such appointments 71 were filled by Hindus and 21 by Muhammadans; the native percentage being, therefore, 7. Thus, even in the case of these highly-paid posts, in which the strength of the European element must in the nature of things be greater, the percentage occupied by Europeans has decreased by 5, while the percentage held by natives has risen to the same extent. The last line but two of Summary I also brings out the striking fact that, though the expansion of British India has resulted in an increase in the total number of highly paid posts, yet the percentage of such posts to the total number of appointments under Government has remained stationary. This affords a complete answer to any suggestion that Government has been raising the standard of pay in the direction of providing a greater percentage of posts for Europeans. The last line but one of the statement deals with aggregate pay. This has risen by 91 per cent. since 1867. When it is remembered that the total number of posts has risen by 110 per cent. during the period, this result indicates that the great increase of efficiency of organization has not been accompanied by disproportionate expenditure. At the same time the aggregate pay drawn by Europeans and Eurasians has risen by 60 per cent. only; while in the case of natives of India the increase is 191 per cent., and in the case of Hindus actually 204 per cent. The last line of the statement confirms the conclusion already suggested, that economy has gone hand in hand with development, by showing that the average pay of a Government appointment in India has been reduced by *R31* or 9 per cent. during the past three and a half decades. This decrease however has fallen entirely upon the European and Eurasian staff, for the average pay drawn by indigenous servants of Government has risen from *R175* to *R188*, or by 7 per cent., while that drawn by other classes has fallen by *R2* or 4 per cent. It may be added that the average pay of a Hindu Government servant (*R186*) approximates closely to that of a Eurasian employé (*R194*) in spite of the higher expenses of living of the latter: while the average pay of a Muhammadan employé (*R96*) is actually higher than either. The last result points to a preference on the part of Muhammadans for the executive (and therefore more highly-paid) posts, to which their traditions and history naturally predispose them, rather than for ministerial employment.

6. To sum up the general results above discussed, the Governor General in Council concludes—

- (i) that the aggregate cost of the civil establishment of Government has nearly doubled;
- (ii) that its average cost has appreciably declined;
- (iii) that there has been no tendency to overweight the administration by the creation of a disproportionate number of highly-paid posts;
- (iv) that while the total average pay has declined, the average pay drawn by natives has risen; i.e., there has been a transfer of posts from European to native agency, which has been more marked in the case of posts on higher, than in the case of those on lower, pay.

7. Some of the further conclusions suggested by Summary II are of interest. This statement deals with the percentages of total posts and of superior and inferior appointments (i.e., posts over and under Rs. 1,000) arranged by provinces. The increase in the percentage of total posts filled by natives is highest in Burma (27 per cent.), the Central Provinces (23 per cent.), and the Punjab (21 per cent.). This result may be attributed generally to the more recent development of these relatively backward provinces, and, in the case of Burma, to the annexation of the Upper Province. The actual percentage of native appointments is highest in Assam (74 per cent.), Madras (68 per cent.), and Bengal (67 per cent.). The first-named province has but few posts over Rs. 500; and the majority of its appointments carry a pay not in excess of Rs. 300, and thus are naturally held by natives. The advanced educational conditions of Bengal and Madras suffice to explain the figures for those provinces. The actual percentage of superior posts held by natives is highest in the cases of Berar (27 per cent.), Bombay (14 per cent.), and Bengal (13 per cent.). The Berar figures are too small to be significant; but the high percentages which Bengal and Bombay also show suggest that in those provinces natives of India have been particularly successful in attaining high office under Government.

8. The Governor General in Council thinks that these results will convince any dispassionate observer that the charge to which reference was made in the opening paragraph of this Resolution is fallacious and unjust. It is not the fact that the Government of this country has abused its patronage to the benefit of any class or community of persons. On the contrary, as the development of the administrative organization has entailed the creation of fresh appointments, endeavour has consistently been made to share the privileges and responsibilities of office impartially between class and class; and His Excellency in Council regards the results of the present inquiry as entitling him to claim that such endeavour has been successful. The general principles which regulate the situation are, he conceives, two in number. The first is that the highest ranks of Civil employment in India, those in the Imperial Civil Service, the members of which are entrusted with the responsible task of carrying on the general administration of the country, though open to such Indians as proceed to England and pass the requisite tests, must, nevertheless, as a general rule be held by Englishmen, for the reason that they possess, partly by heredity, partly by up-bringing, and partly by education, the knowledge of the principles of Government, the habits of mind, and the vigour of character, which are essential for the task, and that, the rule of India being a British rule, and any other rule being in the circumstances of the case impossible, the tone and standard should be set by those who have created and are responsible for it. The second principle is that, outside this *corps d'élite*, the Government shall, as far as possible and as the improving standards of education and morals permit, employ the inhabitants of the country, both because its general policy is to restrict rather than to extend European agency, and because it is desirable to enlist the best native intelligence and character in the service of the State. This principle is qualified only by the fact that in certain departments where scientific or technical knowledge is required, or where there is a call for the exercise of particular responsibility or for the possession of a high standard of physical endurance, it is necessary to maintain a strong admixture, and sometimes even a great preponderance, of the European element. The Governor General in Council concludes this investigation in the satisfactory assurance that these principles have been vindicated in practice. The statistics annexed to this Resolution show that whatever standard is applied to the admission of natives to Government service, whether it be number or proportion of posts held by them, or the average or aggregate pay drawn, the results are the same. There has been a progressive increase in the employment of natives and a progressive decline in the employment of Europeans, showing how honestly and faithfully the British Government has fulfilled its pledges, and how untrue is the charge which is so often heard, of a ban of exclusion against the natives of the country.

ORDER.—Ordered that a copy of the Resolution be forwarded to all Local Governments and Administrations and to the several Departments of the Government of India for information; and that the Resolution be published in the Supplement to the Gazette of India.

H. H. RISLEY,

Secretary to the Government of India.

INDIA (GENERAL):

(iii) Diagram illustrating the proportion of appointments.

Note.—In the diagram the symbol ○ represents Europeans, ● Eurasians, ● Hindus and ◆ Muhammadans.

Each symbol represents 10 per cent. of the total number of appointments. Ordinarily proportions under 5 per cent. have been ignored as between 5 and 10 taken as 10. In some cases, however, half symbols have been used to represent a percentage of less than 5.

Statement of Civil Appointments held by Europeans, Eurasians, Hindus and Muhammadans, since 1867.

PART B.—PROVINCIAL TABLES.

- (i) Number of appointments held by each class.
- (ii) Proportion of appointments held by each class.
- (iii) Diagrams illustrating proportions.

BENGAL.

(iii) Diagram illustrating the proportion of appointments.

Note.—In the diagram the symbol ○ represents Europeans, ● Eurasians, ● Hindus and ◆ Muhammadans. Each symbol represents 10 per cent. of the total number of appointments. Ordinarily proportions under 5 per cent. have been ignored and those 5 and 10 taken as 10. In some cases, however, half symbols have been used to represent a percentage of less than 5.

UNITED PROVINCES.

(iii) Diagram illustrating the proportion of appointments.

Note.—In the diagram the symbol ○ represents Europeans, ● Eurasians, ● Hindus and ◆ Muhammadans.

Each symbol represents 10 per cent. of the total number of appointments. Ordinarily proportions under 5 per cent. have been ignored those between 5 and 10 taken as 10. In some cases, however, half symbols have been used to represent a percentage of less than 5.

PUNJAB.

(iii) Diagram illustrating the proportion of appointments.

Note.—In the diagram the symbol ○ represents Europeans, ⊕ Eurasians, ● Hindus and ♦ Muhammedans. Each symbol represents 10 per cent. of the total number of appointments. Ordinarily proportions under 5 per cent. have been ignored and those between 5 and 10 taken as 10. In some cases, however, half symbols have been used to represent a percentage of less than 5.
